

Product/Maintenance information no. 2016-2

Date: 2016-10-06
Implementing date: 2016-10-01
Created / Approved by: Martin Johansson

Chemical Dosing Equipment CDE II-S/D/T

Background

After having a few customers pointing out that the foam quality in CDE II unit is not optimal when running it on water pressure under 4 bar, we have taken the decision to re-specify the product.

Even though, the unit is working from 3 bar (with not optimal foam quality) the recommendation will be to have minimum 4 bar.

Measures

All data sheets on the website will be changed, please see links below:
